**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The recitations “forging a polygonal engaging hole in the positioning recess” is not understood since it is not clear as to how a hole can be formed in a recess. Additionally, the purpose of the “positioning recess 21” is not understood in view of the specification and drawings.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly et al in view of Stifano, Jr. and Nagao et al or Miller et al.

Kelly et al discloses all of the claimed subject matter except for drilling a positioning hole and forging the socket. Stifano, Jr. discloses steps of forming a socket by forging. It would have been obvious to one having ordinary skill in the art to form the socket of Kelly et al by forging to produce high quality, high production and a low cost operation as taught by Stifano, Jr.

Nagao et al or Miller et al disclose the step of drilling a positioning hole. It would have been obvious to one having ordinary skill in the art to form the device of Kelly et al

Art Unit: 3723

as modified by Stifano, Jr. by drilling a positioning hole to allow for centering in a following step as taught by Nagao et al or Miller et al.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Applicant's arguments filed January 25, 2005 have been fully considered but they are not persuasive.

Applicant's arguments regarding the function of the positioning recess do not overcome the lack of clarity of the original disclosure. The purpose of the "positioning recess 21" is not understood in view of the specification and drawings. Applicant is cautioned against the inclusion of new matter.

Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground(s) of rejection.
